

DIEGO HUNG

FULLSTACK DEVELOPER | GENERATIVE AI

Venezuela, Caracas - Available for global remote work | (58) 412-3288449 | diego.hung.dh@gmail.com

Professional Summary

My focus centers on transforming complex requirements into digital products that are not only functional, but also easy to maintain and scale. I prioritize clean architecture and performance, ensuring that every technical solution contributes to long-term system stability. Having worked in high-demand environments from telecommunications to mobile application development, I bring a comprehensive perspective to solving problems from multiple angles. My workflow integrates generative AI tools, allowing me to optimize development cycles and elevate delivery standards without compromising code quality.

Work Experience

Frontend Developer

Magnetic, march 2025 – march 2026

- Migrated legacy modules to Angular 19, reducing technical debt by 20% and improving system scalability.
- Refactored asynchronous data flows using RxJS and Redux, eliminating platform bottlenecks.
- Designed and integrated Generative AI modules to automate internal processes, decreasing administrative operational times.
- Developed responsive interfaces with Tailwind CSS and integrated Posthog for data-driven user decision-making.

Frontend Developer

Tikket, march 2024 – march 2025

- Developed reusable interface components with TypeScript, optimizing platform consistency and maintainability.
- Translated design mockups and functional requirements into high-performance interactive web applications.
- Implemented frontend development best practices, ensuring seamless responsive design and cross-browser compatibility.

Fullstack Developer

Fibex Telecom, C.A, march 2022 – march 2024

- Developed the full development lifecycle of streaming applications for Roku (BrightScript) and Android TV, digitalizing the service for thousands of users.
- Designed and deployed multiplatform mobile applications using Ionic, integrating geolocation and payment gateways.
- Developed and maintained APIs in Node.js and PHP, ensuring efficient communication between core systems and end-user interfaces.

Technology Analyst

Banco del Tesoro, C.A, march 2017 - march 2022

- Provided support and maintenance for critical financial processes on AS/400 (RPG), ensuring data integrity and banking operational continuity.
- Supervised and optimized electronic payment channels and collection services, securing optimal response times in high-availability transactional systems.

Skills

- **Frontend:** Angular (12-19), React, RxJS, Redux, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS.
- **Backend & AI:** Node.js, PHP, Java, Python, Generative AI Integration (LLMs), REST APIs.
- **Mobile & Multiplatform:** Flutter, Ionic, BrightScript (Roku).
- **Databases:** MySQL, MongoDB.
- **Architecture & Tools:** Clean Architecture, Git, Posthog, Agile Methodologies.
- **Legacy Systems:** AS/400 (RPG).

Education

- B.S. in Systems Engineering | UNEXCA | 2024 - Present
- Associate Degree in Computer Science (TSU) | IUGT | 2019 - 2022

Certifications and Training

- **Node.js:** From Zero to Expert | Udemy, 2023
- **MCSA:** Web Applications | Lourtec, 2020
- Network Engineering | Keys, 2018

Languages

- Spanish: Native
- English: B2 (Professional Working Proficiency)
